- Cultural Competency
- Interpreting Techniques
- Introduction to Health Care Systems
- How to Advocate

BTG:

- Is nationally recognized
- Offers excellent preparation for national certification requirements
- Is accepted by the American Translators Association for continuing education credit

Background

Bridging the Gap is a nationally-recognized medical interpreter training program. The program was introduced by the Cross Cultural Health Care Program in keeping with their mission to advance access to culturally and linguistically appropriate health care. Since NSC Interpretation & Translation holds an unwavering commitment to the provision of culturally and linguistically appropriate services, we adopted BTG as the premier medical interpreter training program of its kind. We became a licensed training organization and launched our program in July of 2012.

For additional information regarding logistics and costs, please visit our website: WWW.NSCPHILA.ORG

Registration for our MARCH 2015 training is now open!

Nationalities Service Center
1216 Arch Street, 4th Floor
Philadelphia, PA 19107
