

News/Updates: Updates to web content for overseas treatment schedules for presumptive parasitic infections

16th March, 2017

Dear State Refugee Health Coordinator:

The Centers for Disease Control and Prevention's Division of Global Migration and Quarantine has updated the overseas intervention '**Treatment Schedules for Presumptive Parasitic Infections**' information on our website.

This table describes presumptive anti-parasitic treatment currently provided to the largest groups of U.S.-bound refugees by region, departure country, and ethnicity/national origin. **All categories of this table have been updated extensively**, and include a new 'Special Notes' regarding exemptions.

The updated table is available here:

<https://www.cdc.gov/immigrantrefugeehealth/guidelines/overseas/interventions/interventions.html>

All overseas interventions for U.S.-bound refugees are available here:

<https://www.cdc.gov/immigrantrefugeehealth/guidelines/overseas/interventions/index.html>

CDC will notify partners of any additional changes pertaining to treatments and guidelines for U.S.-bound refugees.

Sincerely,

Emily Jentes, PhD, MPH
